

NFAC 6118-79

9 November 1979

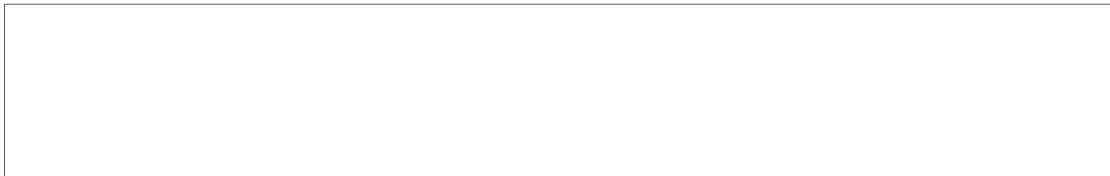

Memorandum for Dick Lehman

Subject: Model NIEs - An Example

1. Some time ago, the DD/NFA called our attention to an old NIE on the Prospects for Peru, dated 18 December 1979, which used the question and answer format quite successfully as a means of organizing information and estimative conclusions in an integrated and readily understood fashion. A copy of the NIE, together with a memorandum explaining the background from the author, [redacted] then in ONE), is attached. 25X1

2. We believe that this is an outstanding NIE in its analysis, style and brevity. The Q&A approach helps both the reader and writer to focus sharply on each important aspect of the problem, and commends itself as a most useful format for this kind of an NIE.

3. You may wish to discuss this with the NIOs at an appropriate time in the future.

25X1
